

VGU – CSE2022

Exercise 5 - Project

October 21, 2022

Write a function to performed background subtraction, as illustrated following

- Library to read an image:
https://github.com/nothings/stb/blob/master/stb_image.h
- Library to write an image:
https://github.com/nothings/stb/blob/master/stb_image_write.h
- Test image:
https://raw.githubusercontent.com/neko941/BALOS/main/images/98239648_p0.png
- Directory structure:

```
├── headers
│   ├── stb_image.h
│   └── stb_image_write.h
├── images
│   └── 98239648_p0.png
└── main.c
```

- Example codes using std library for reading and writing an image:

```

1  /// @file main.c
2  #include <stdio.h>
3
4  #define STB_IMAGE_IMPLEMENTATION
5  #include "../headers/stb_image.h"
6  #define STB_IMAGE_WRITE_IMPLEMENTATION
7  #include "../headers/stb_image_write.h"
8
9  /**
10 * Delete a quarter of the image
11 * @param[in] image the input image
12 * @param[in] width the width of the image
13 * @param[in] height the height of the image
14 * @param[in] channel the channel of the image
15 */
16 unsigned char mask_image(unsigned char *image, int width, int height, int channel
17 )
18 {
19     for (int i = 0; i < height / 2; i++)
20     {
21         for (int j = 0; j < width / 2; j++)
22         {
23             for (int k = 0; k < channel; k++)
24             {
25                 image[i * width * channel + j * channel + k] = 0;
26             }
27         }
28     }
29
30 int main()
31 {
32     // declare variables
33     int width, height, channel;
34     char path_img[] = "../images/98239648_p0.png";
35     char save_path[] = "../images/98239648_p0-New.png";
36
37     // read image data
38     unsigned char *image = stbi_load(path_img, &width, &height, &channel, 0);
39     if (image == NULL)
40     {
41         printf("\nError in loading the image\n");
42         exit(1);
43     }
44     printf("Width = %d\nHeight = %d\nChannel = %d\n", width, height, channel);
45
46     // fill image with black pixels
47     mask_image(image, width, height, channel);
48
49     // save image
50     stbi_write_png(save_path, width, height, channel, image, width * channel);
51     printf("New image saved to %s\n", save_path);
52 }
53

```

Code Listing 1: Delete a quarter of the image

```

1  /// @file main.c
2  #include <math.h>
3  #include <stdio.h>
4
5  #define STB_IMAGE_IMPLEMENTATION
6  #include "../headers/stb_image.h"
7  #define STB_IMAGE_WRITE_IMPLEMENTATION
8  #include "../headers/stb_image_write.h"
9
10 /**
11  * Create a new 1-dimensional array with the given size
12  * @param[in] _size the size of the array
13  * @param[out] _ empty 1-dimensional array filled with 0
14  */
15 unsigned char *uc_arrayNew_1d(int _size)
16 {
17     return (unsigned char *)calloc(_size, sizeof(unsigned char));
18 }
19
